

DID YOU  
KNOW?

## Materials Recycling

H&K Group, Inc. (H&K) is a proactive participant in improving the communities in which we both live and serve by continually striving to preserve our environment. Jobsite and demolition materials can unnecessarily clog up our landfills, since much of this debris is recyclable. We accept these recyclable materials, and then produce recycled concrete and asphalt, fill materials, crushed stone, sand and gravel.

### Our Material Recycling Services include:

- **Construction & Demolition Debris**
- **Reclaimed Asphalt**
- **Clearing & Grubbing Materials**
- **Brick, Block & Concrete & MORE**

H&K produces an excellent recycled concrete product, also known as dense graded aggregate (DGA), which is an environmentally friendly and economical alternative to crushed stone. Recycled crushed concrete can be used as subbase material under parking lots, roadways, pathways and structures and as fill or backfill for grading or leveling applications, plus a multitude of other uses.
