RAHNS CONCRETE TO HOLD “COLORED CONCRETE” WORKSHOP

Rahns, PA – Rahns Concrete, a major supplier and manufacturer of ready-mix and precast concrete products, including color concrete, will be holding a “Changing the Color of Concrete” Workshop on Thurs., April 22, 2010, at their corporate plant, located at 430 Rahns Road at the intersection of Rt. 113 and Rt. 29 in Rahns, PA.

The event will run from 10 a.m. until 2 p.m. and is open to the public. Lunch will be provided for attendees. A rain date is scheduled for Monday, April 26, 2010.

During this workshop, the highly trained, skilled and experienced Rahns Team will reveal to attendees all the possibilities that exist in the use of color concrete, as well as tips for getting the best results. They will be teaching the necessary hands-on placing and finishing techniques used for:

- Color Concrete
- Stamped Concrete
- Stamped Exposed Aggregate
- Micro and Normal Exposed Aggregate

These techniques are a great way to enhance your driveway, walkways, patios, pool decks and more, pleasing both traditional and contemporary settings. They are also an excellent way to restore and transform existing cracked driveways, sinking walkways and rotting decks.

If you or someone you know is looking for a unique way to add lasting value and quality to their home, then this is an event you don't want to miss. You must RSVP for this event by calling Rahns Concrete at 1-800-CONCRETE.

Rahns Concrete has been a proud member of The H&K Group Family of Companies since 1974. They currently serve eastern PA and NJ with a wide array of ready-mix and precast concrete products. With highly trained employees, state-of-the-art equipment, and a commitment to quality and their customers, Rahns can handle projects of any magnitude.
