RINOX PAVERS, LLC BREAKS GROUND ON MANUFACTURING FACILITY IN DOUGLASSVILLE, PA

On Monday, November 08, 2004, officials from Douglassville Township, RINOX, and Rixon Pavers, LLC met at Douglassville's new Trap Rock Business Center for a groundbreaking ceremony to announce construction of a 35,000 square foot state-of-the-art manufacturing facility. Officials were on hand to kick off construction of what will be the first manufacturing facility of its kind in the United States to produce RINOX's "tumbled" concrete pavers and retaining wall units. RINOX, a Canadian-based company, presently operates two other manufacturing facilities of this kind in Canada.

This new Rinox Pavers, LLC manufacturing facility will be located off of Benjamin Franklin Highway in Douglass Township, Berks County within the new Trap Rock Business Center complex. This manufacturing facility plans to employ approximately 25 people, which they expect to draw from the local and/or regional area. This facility will utilize raw materials from Reading Materials Inc.'s adjacent Douglassville Quarry to produce the highest quality hardscaping products available in the industry. Facility site work is to be completed by Reading Site Contractors. Building fabrication is to be completed by Hollenbach Construction, Inc.

Rinox Pavers, LLC is a member of The H&K Group family of vertically integrated companies with 63 operations from 53 locations throughout central and eastern Pennsylvania, New Jersey, Maryland and Delaware. Further information on RINOX's complete line of hardscape and architectural products can be found at www.rinoxinc.com.
