West Mountain

Treads & Garden Path Stepper - Light

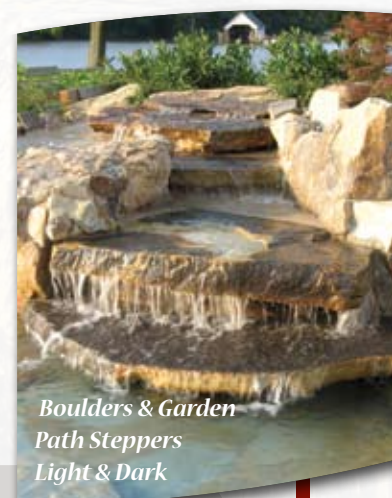

DARK

West Mountain is the ultimate chameleon. As a fieldstone, West Mountain (dark) is dominated by blacks and browns offset by tans, oranges and reds.

LIGHT

But, when split, West Mountain (light) releases a tan base with red and orange striated highlights. The two sides of West Mountain can be used individually as standalones or combined to create a truly magnificent mixture.

Boulders are offered in various sizes and natural shapes, providing infinite application possibilities. Natural barriers, water applications, and accents are just a few.

Sizes: (approx.)
Small 8-12"
Medium 12-24"
Large 24"+

PA Fieldstone

Candy Cane

Garden Path Steppers are naturally flat stones that can be used in a variety of ways to give your home, garden or pond a look of distinction. Their natural shapes lend themselves easily to creating non-uniform rise steps, with a natural appearance like no other. Smaller sizes can set in ground to create a one-of-a-kind pathway or dozens of other applications.

Available Sizes: small, medium & large

DIMENSIONAL FLAGSTONE & PAVERS

Dutch Mountain

shown: dimensional flagstone (pattern), natural cleft

Dimensional Flagstone is a perfect choice for your patio or walkway, much like Standing Broken, but they give your project more uniformity, while retaining the natural colors and textures of the stones. Mix together different sizes to create a custom random pattern.

Pavers are the same, only thicker for load bearing applications, such as driveways, and they are available tumbled.

Available Sizes: 12x12" & up (6" increments up to 36")

Flagstone Thickness: 1" and/or 1 1/2"

Pavers Thickness: 3"

Not available on Dimensional Flagstone.

BELGIAN BLOCK PAVERS

Available Sizes: (LxWxH)

Cubes - 4 x 4 x 4"

Regular - 9 x 4½ x 4½"

Jumbo - 10½ x 7½ x 4"

Belgian Block Pavers are steeped in a rich historic tradition of paving Old World streets and alleyways. Setts, as they are also known, are wonderful as pavers, and also serve as purposeful and interesting edging for walkways, planters and gardens to name a few.

WALL STONE

Wall stone is dry / wet stack-able stone palletized according to rise ranges. Natural stone walls add a wonderful aesthetic to any landscape and can serve as retaining walls. However you employ our wall stone; one thing is for sure, you will not be disappointed.

Typical rise ranges are 1-3" and 4-6" on natural cleft with random depths and widths approximately ranged 6-12".

Check with your salesperson for options and availability.

GLOSSARY

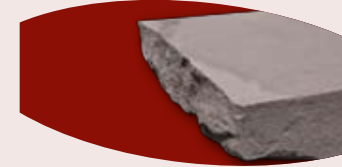

Bull Nosed

Front faces are saw cut to have a smooth and round finish.

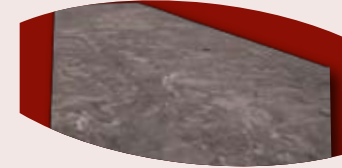

Flamed

Sides, fronts and/or tops are heated with an open flame to remove saw marks and give a slight texture. Can also bring out color in certain material.

Guillotine Cut

Edges (left, right or front) are snapped for a roughly ashlar finish with semi-consistent dimensions.

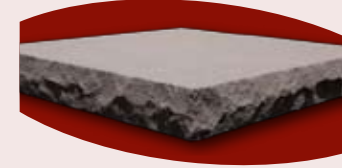

Natural Cleft

Tops, sides, fronts and/or bottoms are left naturally textured and cleft.

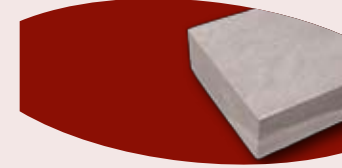

Natural Shape

Stone is left to retain its natural shape, varying dimensions.

Rock-faced

Front fascias (risers) are hand-chiseled, to add additional texture.

Sawn

Edges (top, bottom, left, right and/or front) are sawn to exact dimensions.

Tumbled

Stones are machine tumbled to create softer, weathered edges which give Old World appearance.

A Note About Natural Stone:

Natural stone is a hard substance formed of mineral matter by nature. Due to this fact, variations in color, texture, cleft and size will occur. Samples, photos, brochures and digital images are taken to represent our products as accurately as possible, but may slightly differ from the stone that you actually receive.
